Office Action Summary	Application No. 10/528,524	Applicant(s) KOCH ET AL.	
	Examiner Melvin A. Cartagena	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 is indefinite because the word "gerotor" is not understood; therefore, this claim is not treated under art.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,601,413 to Langley et al.

Langley shows a pumping system as seen in Fig. 1, having a pump 11 driven by motor 12, a flow meter 20 incorporated into the pump, a suction tube 32, a dispense valve 24, a dispense hose 22 and a check valve 27 requiring a predetermine fluid pressure to open.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,743,357 to Few.

Few shows an oil dispenser as seen in Figs. 1, 5 and 6, having a pump 58 driven by a motor, a flow meter 38, a suction tube 154, dispenser valve 26 mounted on the same housing 12 as the display panel 21, dispensing hose 74 and a hose storage reel 60.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,601,413 to Langley et al. in view of US 6,729,364 to Few et al. ('364).

Langley shows all claimed features as discussed above except for the use of wireless communication between the dispensing valve and the flow meter. Few shows an integrated manifold assembly as seen in Figs. 1 and 3, having a dispensing valve actuated with a remote pendant 230. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Langley to include a remote communication between the dispensing valve and the flow meter to automatically stop the flow of fluid once the desired volume has been dispensed while using a conventional delivery hose without any hard wiring as taught by Few.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okoda shows a fuel supplying apparatus.
